

Why The Unpaid Care Dashboard Is Important

Unpaid carers support people with challenges related to disability, long-term physical or mental health, or older age.

Care touches all our lives. Many of us are more likely to become unpaid carers than own a home.

Half of women
have been carers
By age 46

Half of men
have been carers
By age 57

Half of women have been carers by age 46; for men, it's 57.

Every year,
4.3 million people
in the UK become
unpaid carers

Every year, 4.3 million people in the UK become unpaid carers.

Every year,
4.3 million people
in the UK become
unpaid carers

That's only those we know about. The actual figure is likely to be much higher.

£184 billion
saved by the support that
unpaid carers provide

In the UK, unpaid carers save the public purse a staggering £184 billion per year in the support they provide.

A value equivalent to the combined NHS budget across the four nations.

Millions of people now providing over 50 hours of care a week.

Our health and social care systems would collapse without them.

Yet, carers often face financial strain, declining health, and social isolation. It's time for proper recognition and support.

Understanding unpaid care starts with clear, accessible data that everyone can use.

At the Centre for Care, we found that stakeholders and people with lived experience of social care, struggled to access usable information.

Unpaid Care Dashboard

So we created the Unpaid Care Dashboard.

The dashboard was co-produced with unpaid carers, decision makers and people with lived experience at its heart.

This interactive tool uses Census data to provide a visual, easy-to-use snapshot of unpaid care.

Employment

Health and disability status

Local Authorities

Sex

Sexual orientation

Education

Age

Data are provided across Local Authorities, sex, age, sexual orientation, health and disability status, education, Employment.

These data are open to all, offering the public charities advocates and policymakers with vital evidence " and continue with " to drive change, secure funding and shape better policies.

Unpaid carers

Most importantly, it shows that unpaid carers and the people they support are not alone.
